1 Revise History

No.	Version	Release Time
1	2.6.0.1142	2022.7.29

2 Release Version 2.6.0.1142

Models	Software Version	Comment
A32i	2.6.0.1142	

2.1 New Features

- 1. Add playlist function to radio page
- 2. Add extension management functions on the device side, including management

terminals and terminals to be managed

3. Add the function of vibration group on the device side

- 4. Add hotspot setting function on the device side
- 5. Add local information display on the device side

2.2 Optimization

- 1. Administrator mode, add icon indication to the status bar
- 2. Improve partition number support to sort by numbers
- 3. Improved broadcast is divided into immediate broadcast and timing broadcast
- 4. Improve music broadcast support to set volume and priority
- 5. Improve the unattended function
- 6. The hotspot function is enabled by default for line 1, and the other lines are

disabled by default

- 7. Expand the number of hotspot extensions to 50
- 8. Optimize intercom, broadcast, management and other interfaces

2.3 Bug Fix

1. Fix the problem that the broadcast task name is too long and not displayed completely

2. Fix the app crash problem caused by some situations

2.4 New Features Description

1. Add playlist function to radio page

Function Description: After adding a playlist, the user can select the playlist in a play task to add multiple music at once

Realize settings:In the [**Paging System**], set it in [**Broadcast**] >> [**PlayList**], add a custom name in [**List Name**], and click the file in [**File List**]. After clicking, the selected file will appear in [**Selected**] on the right side. After clicking Finish, you can view the successfully added playlist in the playlist. Click[] in [**More**] to view playlist information, or edit an existing playlist.

3. Add the function of grouping ring on the device side

Function Description: The terminals added to the same ringing group can realize the ringing of all terminals in the group at the same time when an incoming call is received. When a terminal answers, other terminals stop ringing.

Realize settings: To set in the [Management] of Paging System, you can click to

add a new group and add terminals in the lower right corner of [**Vibration Group**], Fanvil Technology Co., Ltd

or you can click [Add to Group] in [Management] to add a terminal to an existing group.

4. Add hotspot setting function on the device side

Function Description: The hotspot function can realize group ringing and expand the number of SIP accounts. In the management of Paging System, the same hotspot setting function as the web page can be realized, and the device can be used as a Fanvil Technology Co., Ltd

server or a client.

Realize settings: In the Paging System, set it in [Management] >> [Hotspot

Setting].
