2 Release 2.12.44.8.4

Models	Software Version	Comment
i61/i62/i63/i64	2.12.44.8.4	

2.1 Bug Fix

1. Fix the problem that you cannot log in to the device web page in some cases.

2. Fix the problem that the password is not deleted synchronously on the device after the password is deleted using FDMCS.

2.2 Optimization

1. Compatible with hardware version A and hardware version B

Release 2.12.44.6

Models	Software Version	Comment
i10S/ i10SD/i10SV/ i16S/i16SV/PA3/FH-S01	2.12.44.6	
i61/i62/i63	2.12.44.6	
i64	2.12.44.8	
PA2S	2.12.44.9	

2.3 New Features

1. Support the function of calling multiple numbers at the same time

- 2. PA2S supports noise alarm settings.
- 3. Supports configuring the type of server accessed via web page
- 4. Support control of card reader indicator (i6X only)

2.4 **Optimization**

1. Support with the intercom broadcasting APP for timed broadcasting, real-time broadcasting and shouting and other functions

2. PA2S supports the function of playing specified audio when a specific number is on the line.

3. Support to set Relay through ONVIF management tool.

4. Supports updating the list of allowed incoming calls, restricted incoming calls and restricted outgoing calls through automatic deployment.

5. Add RTP detection function, if it can't detect the RTP of the other end for a period of time, it will hang up the call automatically.

6. Support uploading .ovpn certificate file.

7. Add missing NC configuration items.

2.5 Bug Fix

1. Fixed the issue where the device becomes abnormal during multiple video calls during multi-channel video preview.

2. After enabling ONVIF and event reporting on the Restore device, the device

becomes abnormal after being used for a period of time.

3. After using ONVIF video preview for a period of time, keys and swipes become unresponsive (i6X only)

4. Fix the problem of slow video loading when using NVR video preview

5. Fixed the problem of slow key response when the device performs NVR preview for a long time (i6X only)

6. Fix the problem that after the device has been used for a period of time, the door lock does not close normally when the card or password is swiped to open the door (i6X only)

7. Fixed the problem of occasional exceptions after device upgrade.

8. Fixed the problem that when the door opening mode is double door, the DTMF trigger can only open the door but cannot close the door (i6X only)

9. Fix the problem that timeout dialing does not take effect after setting dialing rules on the device (i64 only)

10. Fix the small problem of hands-free sound in i10S calls

11. Fixed the problem that after the device is set with the PTT function, the call cannot be automatically hung up after the button is released.

12. Fixed the problem of the device being disconnected after being used for a period of time after being registered to some SIP servers.

13. Fix the problem of blurry screen display between device and webrtc video call

14. Fixed the problem of inserting a call during multicast and the multicast is not restored after the call is hung up.

15. Fixed the problem that the setting port is not used when the input port is triggered to send short messages.

16. Fixed the problem of inaccurate response results during device self-test

17. Fixed the issue where the negotiated maximum power is incorrect when the device is connected to a Cisco switch.

18. Fixed the issue where the device does not output ringback tone from line out or spk according to the set call status during a call.

19. Fixed the problem of abnormal sound coming from the speaker when the device starts intercom

2.6 New Functions Description

1. Supports calling multiple numbers at the same time

Fanvil Technology Co., Ltd

(1) Function Key>>Advanced Settings>>Dial Mode Select, select "Group Call".

› System							
> Network	Function Key Settings >>						
→ Line	Programmable Key Settings 🔮 >>Advanced Settings >>						
> Intercom settings	Dial Mode Select Group Call Call Switched Time 16 (5x>50)second(s) First Number Start Time 06:00 (00:00~23:59) First Number End Time 18:00 (00:00~23:59)						
› Call List	First Number Start Time 06:00 (00:00~23:59) First Number End Time 18:00 (00:00~23:59) Apply						
Function Key							

- (2) Set DSSKey1, type as "Memory Key", subtype as "Speed Dial", add multiple IP addresses or numbers, and click Submit.
- (3) Press the Function Key, then it will call out all the numbers at the same time; when one number answers, it will hang up the other numbers automatically.

Network	Function	Key Setting	\$>>										
ACCMOIN	Key	Туре		Name	Value			Subtype		Line		Media	
line	DSS Key 1	Memory Key	~		5070			Speed Dial	~	6161@SIP1	~	DEFAULT	~

	DSS Key 4	None	~			+	-	None	~	AUTO	~	DEFAULT	~
Function Key													

2. PA2S supports noise alarm settings

Function description: When the device continuously detects sound reaching the set decibel, the device will sound an alarm.

In Security Settings>>Noise Alarm Settings, you can turn on the noise alarm and set configuration items such as detection time, alarm interval, and alarm decibels.

Security Settings	Noise Alarm Settings >>		
› EGS Setting	Alarm Detection Duration: Alarm Interval:	5 (0~1440)Minute Alarm Decibel: 600 (1~60)second(s) Trigger By DssKey:	70 (30~85)dB
> Platform Access	Triggered Ringtone:	None Triggered Action: Apply	Send SMS

3. Support control of card reader indicator light

In Intercom Settings>>LED>>Advanced Settings, you can control the card reader indicator to turn on. When configured to be off, it will only light up when a card is swiped; when configured to be on, the card reader indicator light will always be on.

4. PA2S supports playing specified audio when calling a specific number

In Line >> Action Plan, set the action to "Play Audio", fill in the peer number, direction to "Outgoing Calls", type to "Connected", select the audio file to be played and the number of plays, and submit. At this time, the device dials the peer number, and after the peer is connected, it can automatically play the specified audio.

3 Release 2.12.19

Models	Software Version	Comment
i10S/ i10SD/i10SV/ i16S/i16SV/PA3	2.12.19	
i61/i62/i63/i64	2.12.19	

3.1 New Features

- 1. Add door opening trigger capture function
- 2. Support FNRP function. When the device registration is dropped, you can also make normal calls

3.2 Optimization

1. Improve the swipe card after a period of time the device can not normally swipe the card to open the door (only access control equipment)

2. When the device does not get the IP, it can still be scanned by the device management tool

- 3. FH-S01 ceiling speaker adds IP announcement function
- 4. Improve the web page of FH-S01 ceiling speaker
- 5. Improve long-press button support to enable DND function

3.3 Bug Fix

1. Fix the abnormal equipment problem caused by multiple video previews

2. Fix the problem that the video preview becomes purple or blue in some cases

3. Fix the problem of setting fixed length dialing and not calling out immediately after setting dialing rules

3.4 New Functions Description

1. Add door opening trigger capture function

Function description:

Open the door by webpage, swiping card, password and other door opening methods to trigger the door capture, and the captured pictures will be uploaded to the configured server.

Setting method:

 In Intercom>>Camera Settings, configure the Snapshot Trigger Mode, Server Url, username and password.

	Snapshot By Relay:	🗹 Relay1 🔽 Relay2
	Snapshot By Input:	🗆 Input1 🗆 Input2 🔷 Input3
	Snapshot By State:	□ Talking □ Ringing □ Calling
	Snapshot By Motion Detection:	
Snapshot Save:	Server 🗸	
Server Url:	skx	
Username:		Password:

(2) After the setting is completed, the door is opened by webpage, card, password and other door opening methods to trigger the door capture, and the captured pictures will be uploaded to the configured server.

3.5 Optimization Functions Description

1. Improve long-press button support to enable DND function

Function description: In the webpage settings, Function key >> programmable keys >> Desktop Long Pressed, select Do Not Disturb

Key	Deskto	р	Dialer	•	Ringin	Ig	Talki	ing	Desktop Long Pr	esse
Key1	Dsskey1	~	Dsskey1	~	Answer	~	End	~	Do-not-disturb	~
					Lauranteactor			1		

Long press the button to turn on DND in standby, the button light flashes; long press it again to turn off DND

4 Release 2.12.10

Models	Software Version	Comment
i10S/ i10SD/i10SV/ i16S/i16SV/PA3	2.12.10	
i61/i62/i63/i64	2.12.10	

4.1 New Features

- 1. Add Audio Delay Playback feature
- 2. Support custom setting of HTTP API password and user name

4.2 **Optimization**

1. Add a transfer number to the password list. When the phone number can not get through, call the transfer number (only for Door Phone products)

2. Expand the total number of speed-dial button setting numbers to 8

3. When the device is set to static IP and is not connected to the network, the corresponding IP can still be announced

4.3 New Functions Description

1. Add Audio Delay Playback Feature

Function description: Add configuration to control the sound delay playback on the device to solve the problem of multiple PAs playing out of sync in the same space. Set the delay time in the voice setting, and users can adjust the delay time of device playback according to the actual situation.

Setting method: On the website: [Intercom Settings] >> [Media Settings], set the Audio delay time.

Fanvil Technology Co., Ltd

2. Support custom setting of HTTP API password and user name

Function description : The device supports setting custom HTTP API usernames and passwords to increase the security level of the device.

Setting method: On the website [Intercom Settings] >> [Features], Set the "HTTP API user name" and "HTTP API password" configuration. The default user name and password are used for authentication, if the user has a custom user name and password, use the custom one for authentication, the default user name and password are admin, admin

5 Release 2.12.2

Models	Software Version	Comment
i10S/ i10SD/i10SV/ i16S/i16SV/PA3	2.12.2	
i61/i62/i63/i64	2.12.2	
PA2S	2.12.11	

5.1 New Features

- 1. Add the function of automatic hanging up after the intercom opens the door
- 2. Support the function of multicast local music through key
- 3. Add the function of regular multicast music
- 4. Local broadcast supports line out output (PA3)
- 5. The web page supports exporting captured pictures (only for Door Phone products)
- 6. Add location speed dialing function (only for Door Phone products)
- Support the function of adding and deleting card search and password list through HTTP API (only for Door Phone products)
- 8. The web page supports displaying USB and TF card information
- 9. The function key supports setting multiple numbers and supports the sequential call function
- 10. Support 802.1x function
- 11. Support the configuration of DHCP host name
- 12. Add OpenVPN to support TLS-auth key
- 13. Support equipment Echo Test function
- 14. Support the function of sending offline broadcast through SIP message
- 15. Add guest user to support editing time plan
- 16. Add the function of custom uploading audio files and playing the specified audio files after the call and call play.

5.2 **Optimization**

1. Improve Multicast, Intercom and SIP calls, which can be inserted into each other

- 2. When using USB flash disk or SD card to play music, the call interrupts the music playing, and the music playing will resume automatically after the call ends.
- 3. Improve playing the door opening prompt tone in the call and send it to the opposite end (only for Door Phone products)
- 4. Turn off the startup prompt tone by default(PA3, PA2S)
- 5. Improve the webpage to support setting alert tone and busy tone
- 6. Improve the prompt tone of the remote DTMF trigger output port, and support user-defined settings
- 7. The device supports dynamic downloading of ringtone files through the URL of alert info
- 8. When the input port is used as a function key, the behavior in various states can be set
- 9. Improve the default enabling of dialing by "#" (i64)
- 10. Improve the ping function, and automatically return and display the results in case of failure
- 11. Support the device to push the configuration through HTTP API during the call
- 12. Improve the maximum value of talking duration to 12h
- 13. Support dynamic addition of function key values
- 14. Compatible with IPTech View platform

5.3 Bug Fix

- 1. Fix the problem that audio cannot be sent to the opposite end when line in is used as the called call (PA3)
- 2. Fix the problem that the voice fails when the device is calling in some environments
- 3. Fix the problem that the device does not take effect after VLAN is enabled
- 4. Fix the problem that the device is repeatedly disconnected from L2TP VPN
- 5. Fix the problem that when playing timed audio via USB flash drive, the file name is Chinese audio and cannot be played
- 6. Fix the problem that the content played in the first 1s of multicast is incomplete when receiving multicast
- 7. Fix the problem that the device can't actively hang up the call after the call is interrupted in the middle of the broadcast

- 8. Fixed the problem that the call was automatically hung up when the PTT function was used and the key was pressed for 5S
- 9. Fix the problem of invalid volume adjustment in standby mode (PA3)
- 10. Fix the problem that there is no ring back when the device calls out in some environments
- 11. Fixed the problem that when connecting an external camera, the ip could not be called occasionally after using it for a period of time (PA2S)

5.4 New Functions Description

1. Add the function of automatic hanging up after the intercom opens the door

Function description: After the device triggers the output port by inputting DTMF, the device can automatically end the current call after the set on hook waiting time.

Trigger By DssKey:	None 🗸	
Triggered Hangup	Hangup Delay	5

2. Support the function of multicast local music through key

Function description: By pressing the DSS key, you can play or pause local music files in a multicast manner.

Setting method: in the shortcut key setting, select "mcast paging" as the shortcut key type, set the value of 1 as the address of multicast, set the value of 2 as the path of local music file, select "remote only" or "remote&Local" as the media, and set the subtype to the corresponding encoding type to realize the function of local music playback.

"Remote Only" means that only local music is played at the remote end;

"Remote&Local" means that local music files are played at the same time in remote and local areas.

Key	Туре	Name	Value		Subtype	Line	Media
DSS Key	MCAST Pagin 🗸		239.1.1.1:1378]	G.711U 🗸	132@SIP1 🗸	Remote Only 🗸

3. Add the function of regular multicast music

Function description: Within the set timing period, the set audio file can be played in the group domain.

Setting method: Under the setting of scheduled audio playback, you can set the local scheduled playback, multicast scheduled playback, and local and multicast scheduled

playback. Among them, when the multicast is selected to play regularly, the corresponding multicast address can be set to realize the multicast function of playing music in different situations; Select local scheduled playback, and the audio will be played automatically at the set scheduled time; Select local and multicast scheduled playback, and the devices on the local and corresponding multicast addresses will automatically play audio within the set timing period.

Name:		
Type:	Timed play audio	~
Audio Path:	Local 🗸	
Audio Settings:	1.mp3 🗸	Audition Stop
Play mode:	Circle 🗸	
Play Type:	Mcast 🗸	
Mcast Addr:	Local	
Codec:	Local&Mcast ~	
Repetition period:	No repetition	~
	□ 2	Î.
	□ 2	1

4. Local broadcast supports line out output (PA3)

Function description: The set broadcast can be output and played in the form of line out in all, caller / callee / intercom / multicast and Media states. Among them, **All** ------ all audio is output from Line out, **Media** ------ all local audio is output from line out, and **Call (calling/called/intercom/multicast)** ------ when only calling/called/intercom/multicast is established in a call, audio files are output from line out.

5. The web page supports exporting captured pictures (only for Door Phone products)

Function description : When the storage mode is SD or Both, you can export the saved pictures in the SD card to the local, and view the captured pictures.

	Snapshot By Input:	🗆 Input1 🗆 Input2 💭 Input3

	Snapshot By Motion Detecti	on:
Snapshot Save:	Server 🗸	
Server Url:	Server SD	
Username:	Both	Password:
nt Click here to Save Cam	era Photo	

6. The function key supports setting multiple numbers and supports the sequential call function

Function description: Each dsskey supports adding 5 numbers. When the first call is blocked, rejected or unanswered, the next number will be called in sequence.

Key	Туре	Name	Value			Subtype	Line		Media	
DSS Key 1	Memory Key 🗸		312			Speed Dial	132@SIP1	~	DEFAULT	~
			123	+	-					
			456	+						
			789	+	-	Ĩ				
			321	+	-	1				

7. Add the function of custom uploading audio files and playing the specified audio files after the call and call play

Function description: Support user-defined uploading of audio files. When talking with a specified number, the user can play the customized audio files to the opposite end. After the set number of plays is completed, the call will be automatically hung up. Or play customized audio files locally after the call ends.

Action Plan Add

5.5 Optimization Functions Description

1. Improve Multicast, Intercom and SIP calls, which can be inserted into each other

Function description : Set Multicast, Intercom, and SIP priorities. The smaller the number, the higher the priority. 1 is the highest priority. When there is a multi-way

call, there is a high-priority call currently, and a low-priority call is in a waiting state; there is a low-priority call currently, and a high-priority call can preempt the low-priority call.

Priority: SIP Priority

6 Release 2.4.8

Models	Software Version	Comment
i10S/ i10SD/i10SV/ i16S/i16SV/PA3	2.4.8	
PA2S	2.12.4	

6.1 **Optimization**

- 1. Improve RTSP video streaming to support TCP transmission
- 2. Pa2s turns off the startup prompt tone by default
- 3. Pa2s external LED supports custom settings
- 4. Add Russian
- 5. Webpage supports the function of setting alert tone and busy tone options

6.2 Bug Fix

- 1. Fix the problem that the speed dial key is sometimes pressed invalid (PA3).
- 2. Fix the problem that the device is connected to a third-party camera and the video screen is not displayed when making a video call with the mobile app.
